ESSENTIALS OF CHANGE MANAGEMENT

Change strategies fail when leaders continue to increase efforts in the wrong places. 'Context is King' when accelerating strategy or change - this makes it crucial to identify key factors influencing the organisational context and create a clear, aligned view of where to focus energy and resources.

This practical 2 day workshop will allow senior leaders and teams responsible for driving strategic acceleration and change to apply a set of powerful frameworks to their organisations to determine the effectiveness of their approaches to current strategy acceleration and change efforts. At the end of the workshop, delegates will:

- have a deeper understanding of the human response to change and how to leverage this
- understand their role in leading strategy acceleration or change
- have a specific plan of how to approach accelerating strategy and drive change

FACILITATORS

Leon Boyd Swartz (BSc Hons) has over 15 years of local and international experience in the design, facilitation and execution of strategic business realignment, transformation and leadership development solutions. He is founder of Siete Leadership Consulting and has consulted for, amongst other, SAP, EY Africa, Dimension Data Global, Sanlam Group & Nedbank Private Wealth

Lauren Voges (MA, PCC) is a consultant, facilitator and certified Professional Integral Coach with broad experience with large clients in Mining, Energy and Chemicals, and Education in Southern Africa where she designed and facilitated values-driven change and transformation.
